

Durawood Shutters

"The classic look of the Woodbury shutter range in a palette of 6 fashion colours will harmonise with any décor style and provide a superior shutter for your everyday living."

The Woodbury shutter is available in 47mm, 63mm, 89mm and 114mm louver widths.

The Woodbury shutter is produced from a highly resilient ABS co-polymer material, specifically formulated for strength, durability and performance.

This material features UV inhibiting finishes that are tested for high heat deflection to minimise the risk of warping, chipping or cracking – even in the most extreme temperatures.

Water resistant, durable and available in speciality shapes, the Woodbury shutter range provides a vast array of solutions for your windows.
